CONSTRUCTION FLOW METER PERMIT

CONSTRUCTION WATER BILLING RATES:

- Initial ____ 1. \$1,800.00 deposit, refunded if meter and backflow device is returned, is free from damage and is in good condition.
- Initial ____ 2. \$50.00 fee each time the meter needs to be moved.
- Initial ____ 3. \$4.29 for each 100 cubic feet, equal to one unit, of water used.
- Initial ____ 4. \$2.00 per day service charge, calculated monthly.
- Initial ____ 5. Water removed from a hydrant without a flow meter attached is subject to a \$750 fine.

CONSTRUCTION METER CONDITIONAL USES:

- Initial ____ 1. If necessary, South Mesa Water Company operators will determine the amount of water available for construction use.
- Initial ____ 2. If necessary, daily times of use will be determined based upon water availability at a particular site.
- Initial ____ 3. No minimum or maximum flows will be guaranteed.
- Initial ____ 4. South Mesa Water Company will determine the placement and location of the flow meter and backflow device. Construction meters are for construction and emergency water only. Any prolonged use for other than the above uses is not permitted. The length of time a meter for construction can be used will be determined on a monthly basis. All permanent uses of water will require the purchase of an appropriately sized meter to be installed at the prevailing fees of South Mesa Water Company.
- Initial ____ 5. If the construction meter and/or backflow device is stolen, you are responsible for the replacement of the device/s at the prevailing fees of South Mesa Water Company.
